Correction to: Marine Biology (2018) 165:26
<https://doi.org/10.1007/s00227-017-3282-y>

In the original published article, the separators between numerator and denominator degrees of freedom in Tables 2 and 3 were excluded. The corrected Tables 2 and 3 are as follows.

Table 2 Results of ANCOVA analyses of $CT_{\max}$

Source	DF	SS	F	P	η^2_{partial}
Full model	3/137	5.409	9.965	< 0.0001	–
Species	1	0.178	0.985	0.323	0.007
Summer max. temp.	1	1.199	6.627	0.011	0.046
Species × summer max. temp.	1	0.319	1.766	0.186	0.013

Table 3 Results of analysis of morphology by species and long-term average temperature

Source	DF	SS	<i>F</i>	<i>P</i>	η^2_{partial}
Carapace width					
Full model	3/412	720.442	80.825	<0.0001	–
Species	1	47.033	15.830	<0.0001	0.037
Winter min. temp.	1	0.101	0.034	0.854	0.0001
Species × winter min. temp.	1	533.238	179.470	<0.0001	0.303
Relative claw length					
Summer max. temp. (<i>L. pugilator</i>)	1/187	52.281	23.379	<0.0001	0.111
Average temp. (<i>L. panacea</i>)	1/225	19.672	11.827	<0.001	0.499

Carapace width was analyzed using an ANCOVA, while relative claw length was analyzed using separate linear regressions for each species
