Correction to: Semigroup Forum Vol. 67 (2003) 355–372 <https://doi.org/10.1007/s00233-001-0004-y>

In the lattice of subvarieties of the variety $\mathcal{V} = [xyz = xywyz]$ depicted in p. 370, the following inclusions are missing:

$$\begin{aligned} [xyz = xw] &\subset [xyz = xz], \\ [xyz = wz] &\subset [xyz = xz], \\ [xyz = xy] &\subset [xyz = xyw; x^3 = x^2], \\ [xyz = yz] &\subset [xyz = wyz; x^3 = x^2], \\ [xyz = x^2] &\subset [xwy = xvy; x^3 = x^2], \\ \text{and } [xyz = z^2] &\subset [xwy = xvy; x^3 = x^2]. \end{aligned}$$

The complete diagram for the lattice is given in Fig. 1. None of the other results of the paper are affected by the missing inclusions.

Communicated by Mikhail Volkov.
