**Season 2 is coming soon!**

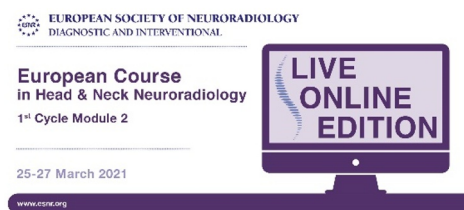

The new series of free webinars is coming soon, please follow our website and social media accounts for more information. ESNR members can view the recordings of the lectures from season 1 on our website: <https://www.esnr.org/en/esnr-web-lectures/>

The European Course in Pediatric Neuroradiology, 10<sup>th</sup> Cycle, Module 2 will be organized as a **live online course** on 23-27 January 2021, due to the current situation in relation to the spread of corona virus – please mark your calendars! As you know, the course was originally planned to be held in Istanbul. Due to covid-19 pandemic, ESNR and ESFR were forced to take the decision for this module to be organized completely virtual including the modular exam on the same announced dates.

The lectures, workshops, keynote lectures and difficult cases panel will be all live. Participants will be divided into several workshop groups depending on number of attendees and will participate interactively at the workshops.

Visit ESNR website for more information about the course as well as program and registration.

After the successful 1 module with 300 participants from all around the world, we are happy to announce the 2<sup>nd</sup> Module of the 1<sup>st</sup> Cycle of the brand-new European Course in Head & Neck Neuroradiology. This live online course will be on March 25-27 and comprises 30 lectures and 12 workshops. It is the part of a 2-module course that will lead to a European Diploma in Head & Neck Neuroradiology for those that pass all exams.

Due to Covid-19 pandemic and current travel restrictions, we regret to inform you that the course will not be held as a physical meeting, but we are happy to inform you that the course will proceed as a **live online course** on March 25-27, 2021.

Program and registration are online. To support the ESNR members, we have prepared some very attractive registration rates.

For information on all other courses please visit our website [www.esnr.org](http://www.esnr.org)
