The original publication “Incidental findings on 3 T neuroimaging: cross-sectional observations from the population-based Rhineland Study”, included the following errors, which have now been corrected:

1) Figure 1 included a typo in the final sample size. Figure 1 has been updated.

2) Table 1:

- Subheaders were not separated: “Incidental findings that need to be referred for diagnostic work-up” and “Incidental findings that do not need diagnostic work-up and are not communicated to the participant”. Table subheaders have been updated.

- “Malignant tumors, inclusive glioma” has been corrected to “Malignant tumors, including glioma”.
- The “†” notation after “Acute findings” and “‡” after “Vascular disease” have been deleted.
- Table layout has been updated to indent some incidental findings.

3) Table 3 footnotes have been updated so the order of the signs are correctly presented.

The original article has been corrected.
