Correction to: Eur J Plast Surg 41(2): 207–216
<https://doi.org/10.1007/s00238-017-1378-8>

The original version of this article contained a mistake in the section Development of total score for the assessment tool. The text "To calculate a total score for the developed instrument, a previously published formula was used [12, 13]: cutoff time (seconds) – completion time (seconds) – (10 × sum of errors). As nine different variables were evaluated, a maximum of nine errors could be committed. The calculated time was the total time used for both exercises (completion time simple suture +

completion time continuous suture)." should have been "To calculate a total score for the developed instrument, a modification of a previously published formula was used [12, 13]: cutoff time (min) – completion time (min) + (8 – sum of errors). As eight different variables were evaluated, a maximum of eight errors could be committed. The calculated time was the total time used for both exercises (completion time simple suture + completion time continuous suture)."

The online version of the original article can be found at <https://doi.org/10.1007/s00238-017-1378-8>
