Retraction Note to: Eur J Plast Surg (2007) 29:277–283
<https://doi.org/10.1007/s00238-006-0103-9>

The Editor-in-Chief has retracted this article [1] because significant parts of the text and Figs. 1 to 6 and 7a were duplicated from a previously published article by Romo et al [2]. Additionally, Figs. 7b to 7 h have been removed because the author did not obtain written consent to publish from the patients shown. The author agrees with this retraction.
