Appl Microbiol Biotechnol (2004) 66:567–574

The following errors were not corrected at the proof stage:

Table 2. The similarity value for *C. denitrificans* is 90.5 instead of 94.4.

Fig. 4. The legend should read: Time change of the concentration of acetonitrile (*closed squares*), biomass (*open squares*) and ammonium (*open circles*) in a conical flask inoculated with *Comamonas* sp. and incubated at room temperature under sterile conditions.

Discussion: The strain isolated did not relate to *C. nitratorans* or *C. denitrificans* because it did not denitrify nitrate (data not shown).
