Unfortunately, the following errors
occurred:

1. In Eq. 9 the right formula has '*i*'
and '*T*' inverted (i.e., $i \geq T$ and not
viceversa in both sides of the
equation) and '*f*' in the power of
the exponential function is in-
stead 'lambda' in greek-letter.
The right equation should read:

$$P[N(t) \geq 1, t | i \geq T] = 1 - e^{-\lambda(i \geq T)t}$$

2. In the References, the right jour-
nal citation of Genevois and
Romeo 2003 is 'Geomech' and
not 'Geomach'. It should read:
Genevois R, Romeo RW (2003)
Probability of failure occurrence
and recurrence in rock slopes
stability analysis. Int J Geomech
ASCE 3:34–42
