

ANNOUNCEMENTS

The International Skeletal Society (ISS) is pleased to announce an award for the best paper in *Skeletal Radiology* on a new, novel or innovative technological application for the diagnosis, management or treatment of musculo-skeletal disease.

The award of \$1500 is intended for first author non-members of the ISS. The award is to be used as support for travel to and attendance at the annual meeting of the ISS, where the paper will be presented.

The recipient of the award will be invited to attend the Members Scientific Session and Refresher Course of the ISS.

2006 awards

The International Skeletal Society and *Skeletal Radiology* are pleased to announce the 2006 winners of the following awards.

Corrinne Farrell award for the best scientific paper on a tumor or tumor-like disorder.

Spinner RJ, Scheithauer BW, Desy NM, Rock MG, Holdt FC, Amrami KK. Coexisting secondary intraneural and

vascular adventitial ganglion cysts of joint origin: a causal rather than a coincidental relationship supporting an articular theory. *Skeletal Radiol* (2006) 35:734–44.

A.J. Darby award for the best case report.

Hatano H, Morita T, Kobayashi H, Segawa H, Honma K. Focal lymphoid hyperplasia in a lipoma, mimicking liposarcoma. *Skeletal Radiol* (2006) 35:613–8.

Best paper in *Skeletal Radiology* describing a new, novel or innovative technique whose first author is a non-member of the ISS.

House CV. CT guided obturator nerve block via the posterior approach. *Skeletal Radiol* (2006) 35:227–32.

Dr. House will make an oral presentation on this topic at the next Members meeting in Budapest in October 2007.

Corrinne Farrell award for the best case presentation at the Members meeting in Vancouver, September 2006.

Case 20. Ishida T, Abe S, Imamura TT.

Intraosseous pilomatixoma/proliferating pilar cyst of the tibia in Gardner's syndrome.
