Erratum to: World J Surg DOI: 10.1007/s00268-011-1158-8

Following are corrections to the original article. The specific changes are indicated in **bold**:

1. The **corresponding author** is **Kendra G. Bowman**.
E-mail: kgbowman@partners.org.

2. The first sentence of the Introduction section is revised as follows:

Disparity in surgical care across social and economic strata worldwide is a recognized problem [1–3], and the global **disability from surgical disease is estimated to account for 11% of the global burden of disability**, greater than HIV, TB, and malaria combined [1].

3. The fourth sentence in the fifth paragraph of the Introduction section is revised as follows:

There is a severe shortage of trained surgical clinicians, with an average of **four** surgeons produced each year.

4. The first sentence in the third paragraph of the Results section is revised as follows:

Of the **3,885** acquired conditions, there were 2,432 (42.1%) injuries, with burns the most common cause of injury accounting for 1,985 (34.6%) of all surgical cases.

5. The revised caption of Table 2 is as follows:

Congenital and acquired conditions

6. The correct first heading in Table 2 is “Congenital conditions.”
