<https://doi.org/10.1007/s00268-016-3632-9>

In the original article there is an error in the legend in Fig. 4. Following is corrected Fig. 4.

Also, the results in the last sentence of Results section on page 2878 are incorrect. Following are the corrected results:

There was not a significant difference (– 18 min, CI – 47.8:11.7, $p = 0.233$) in operative times from before ($m = 310$ min) versus after ($m = 328$ min).

Fig. 4 The surgical strategy. Answers in percentages by professional category to the question to surgeons “Has a pause made you change surgical strategy” and to staff “Do you perceive that taking of a pause has made surgeons change surgical strategy?”

The original article can be found online at <https://doi.org/10.1007/s00268-016-3632-9>.
