There is a minor error in the Fig. 4 legend:

2nd sentence: “neck thrill following insertion of a right subclavian dialysis line.” should read “neck thrill following attempted insertion of a right subclavian dialysis line under general anaesthetic”.

Last sentence: “The consensus was to treat this AV fistula conservatively” should read “The AV fistula was treated conservatively as the patient declined to have any intervention to treat the fistula despite our recommendation to do so”
