Erratum to: Surg Radiol Anat DOI 10.1007/s00276-015-1455-2

In the original publication of the article, the number of patients and the incidence value are incorrect. The authors would like to correct the numbers and values as given below:

In the Abstract section, the first sentence in the heading “Results” should read, “The estimated incidence of the AP was 0.05 %”.

In the Results section, the paragraph below the heading “Incidence” should read, “During the study period, contrast-enhanced chest CT scans of 5935 patients were interpreted by the radiologist (D.H.H.). The incidence of the AP was assessed as 0.05 % (3/5935)”.

In the Discussion section, the last sentence of the first paragraph should read, “However, the incidence (0.05 %) of this condition had never been assessed before the current study”.

The online version of the original article can be found under doi:[10.1007/s00276-015-1455-2](https://doi.org/10.1007/s00276-015-1455-2).
