Concomitant occurrence of MALT lymphoma and multiple myeloma

Published online: 15 July 2004
© Springer-Verlag 2004

Ann Hematol (2004) DOI 10.1007/s00277-004-0870-y

An oversight by the author led to the following error:

In the discussion section, paragraph 4, line 1 it is stated that MALT lymphoma comprises 25-50% of all new lymphoma cases.

This is wrong: Extranodal lymphomas comprise 25-50% of all new lymphomas but MALT lymphoma comprises only 8% of all new lymphoma cases.
