### Correction to: Annals of Hematology

<https://doi.org/10.1007/s00277-020-04133-z>

The original version of this article inadvertently contained a typographical error in the Abstract section. In the Abstract, the  $p$ -value demonstrating the statistically significant difference between the transfusion-independence rate for the eculizumab-treated group and the eculizumab-untreated group should be  $p = 0.0078$ , and not  $p = 0.078$ . The correct  $p$ -value ( $p = 0.0078$ ) has been mentioned in the main text of the manuscript, and the error is only in the Abstract section.

The original article has been correction.
