Acute promyelocytic leukemia with additional chromosome abnormalities in a renal transplant case

Published online: 29 March 2001
© Springer-Verlag 2001

**Annals of Hematology (2000)
DOI 10.1007/s002770000273**

Due to an unfortunate error the online version of the article was assigned the wrong rubric. It should be a case report not an original article.

The third sentence of the abstract should read: At diagnosis he presented typical t(15;17) with additional abnormalities, including +8,t(13;22)(q12;q13) and an abnormal chromosome 1 which was better characterized by fluorescence in situ hybridization (FISH).

The online version of the original article can be found at
<http://dx.doi.org/10.1007/s002770000273>
