In the original version of this paper, the Chemotaxonomic Characteristics in the Results and Discussion section and legend of Table 2 given in the above paper are incorrect. These errors are corrected with this erratum.

Chemotaxonomic Characteristics

As shown in Table 2, the predominant cellular fatty acids of strain 04OKA-3-121^T were identified as iso-C15:0, iso-C15:1 G, and summed feature 3 (C16:1 *ω*7c and/or C16:1 *ω*6c). On the basis of the fatty acid composition, strain 04OKA-3-121^T could be differentiated from the phylogenetically closest taxa such as *P. thermophila* KCTC 22016^T, *Spongiimicrobium salis* KCTC 42753^T, *Pricia antarctica* ZS1-8^T, *Z. galactanivorans* DSM 12802^T, *K. aquimaris* KCTC 22188^T, and *M. ruestringensis* DSM 13258^T (Table 2).

Legend of Table 2

7—*Muricauda ruestringensis* DSM 13258^T [15]
