Correction to: Curr Microbiol (2016) 72:228–233
<https://doi.org/10.1007/s00284-015-0945-0>

The original version of this article unfortunately contained a mistake in the species name description. Also the accession number was published incorrectly.

The corrected version is given below:

On page 232, *L. n. aqua* should read as *L. fem. aqua*. This should read as: *Loktanella aquimaris* (a.qui.máris. *L. fem. aqua*, water; *L. gen. n. maris*, of the sea; N.L. *gen. n. aquimaris*, of the water of the sea).

On page 228 the article note should read as, The GenBank/EMBL/DDBJ accession number for the 16S rRNA sequence of strain C5^T (=KEMB 3-892^T = JCM 30382^T) is KP716799 and C9 (=KEMB 3-893 = JCM 30383) is KP883300.

On page 233, the text, “The type strains C5^T (=KEMB3-892^T = JCM 30382^T) and C9 (=KEMB 3-893 = JCM 30383^T) was isolated from seawater in Tongyeong, South of Korea” should read as “Strain C9 (=KEMB 3-893 = JCM 30383), an additional strain of the species, as well as the type strain C5^T (= KEMB 3-892^T = JCM 30382^T) were isolated from seawater in Tongyeong, South of Korea.”

The original article can be found online at <https://doi.org/10.1007/s00284-015-0945-0>.
