Correction to: *Current Microbiology* (2017) 74:1137–1147
<https://doi.org/10.1007/s00284-017-1296-9>
and <https://doi.org/10.1007/s00284-020-02133-w>

The original and previous erratum versions of this article contained errors in the description of novel species. These errors are corrected with this corrigendum.

The corrected version is given below.

Description of *Fusobacterium polymorphum* sp. nov.

Fusobacterium polymorphum: po.ly.mor'phum. N.L. neut. adj. *polymorphum*, multiform, polymorphic

Elevation in rank from *Fusobacterium nucleatum* subsp. *polymorphum* (ex Knorr 1922) Dzink et al. 1990. [7].

The properties are as given by Dzink et al. [7] and Gharbia and Shah [12]. The type strain is ATCC 10953^T (= DSM 20482^T).

Description of *Fusobacterium vincentii* sp. nov.

Fusobacterium vincentii: vin.cen'ti.i. N.L. gen. masc. n. *vincentii*, of Vincent, referring to H. Vincent who studied the organism originally isolated from Vincent's angina and necrotizing ulcerative gingivitis.

Elevation in rank from *Fusobacterium nucleatum* subsp. *vincentii* (ex Knorr 1922) Dzink et al. 1990. [7].

The properties are as given by Dzink et al. [7]. The type strain is ATCC 49256^T (= DSM 19507^T).

Description of *Fusobacterium animalis* sp. nov.

Fusobacterium animalis: a.ni.ma'lis. L. neut. n. *animal* (gen. *animalis*), an animal; L. gen. n. *animalis*, of an animal.

Elevation in rank from *Fusobacterium nucleatum* subsp. *animalis* Gharbia and Shah 1992 [13].

The properties are as given by Gharbia and Shah [13]. The type strain is ATCC 51191^T (= DSM 19679^T).
