# Correction to: Matrix group structure and Markov invariants in the strand symmetric phylogenetic substitution model

**Peter D. Jarvis**[1] · **Jeremy G. Sumner**[1]

## Correction to: J. Math. Biol. (2016) 73:259–282
### https://doi.org/10.1007/s00285-015-0951-7

The original version of this article was published on 11 December 2015 in Volume 73, issue 2, page 259–282, contained a mistake in the Abstract. The abstract gave a formula for the numbers of such invariants for this model, for L taxa, of quadratic and cubic degree, which contained a pre factor $\frac{1}{3}$ which was a typographical error.

The sentence in Abstract which previously read as

"In particular, in the quadratic and cubic cases we prove there are precisely $\frac{1}{3}(3^L + (-1)^L)$ and $6^{L-1}$ linearly independent Markov invariants, respectively."

Should read as

"In particular, in the quadratic and cubic cases we prove that there are precisely $\frac{1}{2}(3^L + (-1)^L)$ and $6^{L-1}$ linearly independent Markov invariants, respectively."
