The authors regret that in the original publication of “Summer phyto- and bacterioplankton communities during low and high productivity scenarios in the Western Antarctic Peninsula”, the Acknowledgements were incomplete, and they provide this completed version:

The authors gratefully acknowledge the Armada de Chile staff at Arturo Prat Station and the staff from the Chilean Antarctic Institute (INACH); their support made possible the sampling in Chile Bay. The study used data that have been collected and analysed by Beatriz Fernández in the course of her postdoctoral project (Fondecyt Postdoctoral N° 3140422 [2014-2016]). The authors also thank the Department of

Climatology, Centro Meteorológico de Valparaíso, Armada de Chile, for the meteorological data and María Estrella Alcamán, Cynthia Sanhueza, Laura Farías and Josefa Verdugo for their assistance with sample collection.

**Publisher’s Note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
