In the sentence beginning ' E_a is given by...' in Results and discussion section of this article, the text 'the Fermi energy, respectively' should have been added.

To read:

E_a is given by either $E_C - E_F$ or $E_F - E_V$, depending on whether electrons or holes are the charge carriers of the film. E_C , E_V , and E_F are the edges of the conduction band, the valence band and the Fermi energy, respectively.

The original article can be found online at <https://doi.org/10.1007/s00339-021-04806-0>.
