In this issue, we have ten regular papers:

The first regular paper is titled “Physics-inspired approach to realistic and stable water spray with narrowband air particles” by Jong-Hyun Kim from Kangnam University, Korea, Wook Kim from Korea University, Korea, and Jung Lee from Hallym University, Korea.

The second paper is “Salient object detection via compactness and objectness cues” by Qing Zhang, Wenju Li, Yanjiao Shi, Guogang Cao from Shanghai Institute of Technology, Shanghai, China, and Jiajun Lin from East China University of Science and Technology, Shanghai, China.

The third paper is “Detecting and inferring repetitive elements with accurate locations and shapes from façades” by Yongjian Lian, Xukun Shen and Yong Hu from Beihang University, Beijing, China.

The fourth paper is “Efficient oriented particle arrangements for position-based dynamics simulation” by Young Jin Oh, Yeonbi Shin and In-Kwon Lee from Yonsei University, Korea.

The fifth paper is “Reflection reprojection using temporal coherence” by Naiwen Xie, Lili Wang from Beihang University, Beijing, China, and Philip Dutre from KU Leuven, Belgium.

The sixth paper is “Uncertainty visualization for variable associations analysis” by Huijie Zhang, Dezhan Qu, Quanle Liu, Qi Shang, Yafang Hou from Northeast Normal University, China, and Han-Wei Shen from The Ohio State University, Ohio, the USA.

The seventh paper is “Adaptive rendering based on robust principal component analysis” by Hongliang Yuan and Changwen Zheng from Chinese Academy of Sciences, Beijing, China.

The eighth paper is “INPAC: INdependent PAss Coding algorithm for robust image data transmission through low SNR channels” by Cheggoju Naveen and Vishal R. Satpute from Visvesvaraya National Institute of Technology, Nagpur, India.

The ninth paper is “Natural image noise level estimation based on local statistics for blind noise reduction” by Asem Khmag, Abd Rahman Ramli, S. A. R. Al-haddad, Noraziah-tulhidayu Kamarudin from University of Az Zawia, Libya, and University of Putra Malaysia, Malaysia.

The tenth paper is “Removing Monte Carlo noise using a Sobel operator and a guided image filter” by Yu Liu, Changwen Zheng, Quan Zheng and Hongliang Yuan from Chinese Academy of Sciences, Beijing, China.
