In this issue, we have fourteen regular papers and one correction:

The first paper is titled “Point set registration based on feature point constraints” by Mai Li, Mingxuan Zhang, Dongmei Niu, Muhammad Umair Hassan and Xiuyang Zhao from University of Jinan, China and Na Li from Qilu Institute of Technology, China.

The second paper is “Computer-aided superimposition via reconstructing and matching 3D faces to 3D skulls for forensic craniofacial identifications” by Joi San Tan from Universiti Tunku Abdul Rahman—Kampus Perak, Malaysia, Iman Yi Liao from University of Nottingham Malaysia Campus, Malaysia, Ibrahim Venkat from Universiti Teknologi Brunei, Brunei, Bahari Belaton and PT Jayaprakash from Universiti Sains Malaysia, Malaysia.

The third paper is “Effect of layerwise fine-tuning in magnification-dependent classification of breast cancer histopathological image” by Shallu Sharma and Rajesh Mehra from National Institute of Technical Teachers’ Training and Research Chandigarh, India.

The fourth paper is “Fine-grained action recognition using multi-view attentions” by Yisheng Zhu and Guangcan Liu from Nanjing University of Information Science and Technology, China.

The fifth paper is “A new TLD target tracking method based on improved correlation filter and adaptive scale” by Xin Yang, Sijun Xia and Dake Zhou from Nanjing University of Aeronautics and Astronautics, China and Songyan Zhu from Jiangsu College of Engineering and Technology, China.

The sixth paper is “DRCDN: learning deep residual convolutional dehazing networks” by Shengdong Zhang and Fazhi He from Wuhan University, China.

The seventh paper is “Weakly supervised deep network for spatiotemporal localization and detection of human actions

in wild conditions” by Naresh Kumar and Nagarajan Sukanam from Indian Institute of Technology Roorkee, India.

The eighth paper is “Robust salient object detection for RGB images” by Zhengyi Liu, Qian Xiang, Jiting Tang, Yuan Wang and Peng Zhao from Anhui University, China.

The ninth paper is “Video stitching based on multi-view spatiotemporal feature points and grid-based matching” by Krishnakumar K and Indira Gandhi S from Madras Institute of Technology, Anna University, India.

The tenth paper is “Multi-level colored directional motif histograms for content-based image retrieval” by Jitesh Pradhan, Ashok Ajad, Arup Kumar Pal and Haider Banka from Indian Institute of Technology (Indian School of Mines) Dhanbad, India.

The eleventh paper is “An integrated approach for medical abnormality detection using deep patch convolutional neural networks” by Pengcheng Xi, Chang Shu and Louis Borgeat from National Research Council Canada, Canada, Haitao Guan, Nantong No. 3 People’s Hospital, China and Rafik Goubran from Carleton University, Canada.

The twelfth paper is “A novel deep network and aggregation model for saliency detection” by Ye Liang, Hongzhe Liu and Nan Ma from Beijing Union University, China.

The thirteenth paper is “Residual feature pyramid networks for salient object detection” by Ben Wang, Shuhan Chen, Jian Wang and Xuelong Hu from Yangzhou University, China.

The fourteenth paper is “An improved correlation filter tracking method with occlusion and drift handling” by Jun Liu, Zhongqiang Luo and Xingzhong Liu from Sichuan University of Science and Engineering, China.

The fifteenth paper is “Correction to: An improved correlation filter tracking method with occlusion and drift handling” by Jun Liu, Zhongqiang Luo and Xingzhong Liu from Sichuan University of Science and Engineering, China.
