Correction to: Heart Vessels
<https://doi.org/10.1007/s00380-017-1072-6>

In the original publication of the article, the values of blood urea nitrogen (BUN) and plasma renin activity (PRA) have been published incorrectly and the corrected values are as follows.

In abstract, the following sentence should read as, "... Multivariate analysis revealed that blood urea nitrogen (BUN) [cutoff: 34 mg/dL, odds ratio (OR) 9.0, 95% confidence interval (CI) 1.42–57.3, $p < 0.01$] and plasma

renin activity (PRA) (cutoff 4.7 ng/mL/h, OR 6.1, 95% CI 1.01–36.4, $p < 0.01$) at baseline were independent predictors for tolvaptan responsiveness..."

Under the section "Multivariate analysis", the last sentence should read as "...The only variables related to tolvaptan responsiveness were BUN and PRA level (odds ratio [OR] 9.01, 95% confidence interval [CI] 1.42–57.3; OR 6.06, 95% CI 1.01–36.4, respectively)."

The original article was corrected.

The original article can be found online at <https://doi.org/10.1007/s00380-017-1072-6>.
