Fig. 2 Niño 3.4 index standard deviation versus the temporal standard deviations of **a** OHC100 and **c** OHC700 averaged over the N3.4 region from ORAS4 (1979–2013 and 1992–2013), HEN4 (1992–2013), JMA (1992–2012) and CMIP5 models; fraction of the standard deviations of **b** OHC100 and **d** OHC700 in the N3.4 region and

N3.4 index standard deviations. Boxes mark the inner quartiles and whiskers mark the 2.5 and 97.5 % percentiles, respectively; uncertainties are estimated with a block bootstrap method (length of the blocks is set to 6 months); Color code for **(b)** and **(d)** is the same as for **(a)** and **(c)**
