**Correction to: Climate Dynamics**  
<https://doi.org/10.1007/s00382-020-05398-w>

The original version of the article contained error in the Fig. 8 caption was swapped and below is the corrected caption.

**Fig. 8** TOE patterns of temperature (**a, c, e**) and  $T_w$  (**b, d, f**) as a function of elevation over the European (**a, b**), East Asia (**c, d**), and Africa (**e, f**) domains derived from the RCMs and GCMs simulations. The different size of circle is proportional to the percentage of number of grids included in individual height ranges. The total number of grids used

for the calculation of RCMs and GCMs are different because their resolutions are different.

The original article has been corrected.
