Unfortunately, on 18.10.2019 a preliminary and incorrect version of the flowchart (Fig. 1) was published online. In the corrected and final version one additionally identified record is listed in the flowchart. The records after removal the duplicates are $n=4451$ and the records that are excluded after title abstract screening are 4571. The studies included are $n=25$. In addition, a further exclusion category is added after full text screening (Study not available: $n=1$) and an existing exclusion category (Repeated data use of the original study) was corrected to $n=1$, which can also be found in the corrected online supplement No. 2.

Please note the correct version of

■ **Fig. 1.**

The original article has been corrected.
