

When we published the article

“Six-months patency of three long drug eluting stents documented by surveillance coronary multi-detector computed tomography (MDCT)” by M.R. Movahed (the online version can be found at <http://dx.doi.org/10.1007/s00392-006-0430-7>) the authors name unfortunately was mis-typed to “Mohaved” in the address-section.

The publisher apologies for any inconvenience caused by that mistake.
