<https://doi.org/10.1007/s00394-021-02514-2>

The Editor-in-Chief has retracted this article due to considerable overlap with another article by the same authors [1] without appropriate citation. The data presented in Table 3 has been previously included as Table 5 in [1]. Similarities have been identified in the study population, methods and research questions. The authors stated that both articles contain data from the same clinical trial, but they included different outcomes.

None of the authors agree to this retraction.
