**Fig. 1** Wound quality of life survey given to our patients. Of note, the Wound-QoL instrument displayed in this figure was slightly modified for the purposes of this study. The original wording of the Wound-QoL instructions reads as follows: "Wound-QoL questionnaire on quality of life with chronic wounds. With the following questions, we aim to find out how your chronic wound(s) affect(s) your quality of life. Please tick one box per line!"

Wound-QOL Survey

**Please answer the following questions to the best of your ability. These questions are trying to assess how wound care has affected your quality of life in the last seven days.**

**In the last seven days:**

		Not at all	A little	Moderately	Quite a lot	Very much
1	...my wound hurt					
2	...my wound had a bad smell					
3	...there was a disturbing discharge from the wound					
4	...the wound has affected my sleep					
5	...the treatment of the wound has been a burden					
6	...the wound has made me unhappy					
7	...I have felt frustrated because the wound is taking so long to heal					
8	...I have worried about my wound					
9	...I have been afraid of the wound getting worse					
10	...I have been afraid of knocking the wound					
11	...I have had trouble moving about because of the wound					
12	...climbing stairs has been difficult because of the wound					
13	...I have had trouble with day-to-day activities because of the wound					
14	...the wound has limited my leisure activities					
15	...the wound has forced me to limit my activities with others					
16	...I have felt dependent on the help from others because of the wound					
17	...the wound has been a financial burden to me
