DOI 10.1007/s00404-015-3625-1**

We regret a typo error in the official publication of “Materials and methods”, animals section’s last paragraph. In this section, the fifth line amount of 5 mM

Evans Blue dye introduced through the jugular vein should be 0.2 ml instead of 2 ml. The correct sentence is given below:

Following a neck dissection, 0.2 ml of 5 mM Evans Blue (Sigma-Aldrich, USA) dye was introduced through the jugular vein to evaluate the vascular permeability.

The online version of the original article can be found under doi:[10.1007/s00404-015-3625-1](https://doi.org/10.1007/s00404-015-3625-1).
