Data transcriptional errors have been identified in two sequences from a Japanese mtDNA database that we published in this article. The electronic supplementary table of that paper lists sequences JP059 and JP061 as having an A at position 113. This is incorrect. In both cases, the position should have been listed as 103, with an A transition. A corrected supplementary table is now available (<http://dx.doi.org/10.1007/s00414-004-0499-3>), and GenBank sequences with accession numbers AF501144 and AF501214 have also been corrected. We thank Claudio Bravi for alerting us to this error.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s004140100211>

Electronic Supplementary Material Supplementary material is available in the online version of this article at <http://dx.doi.org/10.1007/s00414-004-0499-3>
