The recent publication by Samuele Maria Marcora and Walter Staiano entitled “The limit to exercise tolerance in humans: mind over muscle?” (*Eur J Appl Physiol* 109(4):763–770, 2010; published online on March 11, 2010; published in print in July 2010) has provoked considerable discussion. This includes a Letter to the Editor by Mark Burnley entitled “The limit to exercise tolerance in humans: validity compromised by failing to account for the

power–velocity relationship” (*Eur J Appl Physiol* 109(6):1225–1226, 2010; published online on April 7, 2010; published in print in August 2010). We regret to note, however, that due to an oversight in the publication process, the Authors’ response to this Letter was actually published prior to Dr Burnley’s Letter. This Response can be found in *Eur J Appl Physiol* 109(4):787–788, 2010; published online on May 5, 2010; published in print in July 2010). We apologise to both Dr Marcora and Dr Staiano and also to Dr Burnley for any confusion that has resulted.
