The original version of this article unfortunately contained a mistake. The correct information is given below.

In the second sentence of the “Method” section of the abstract, the authors stated that “On three subsequent occasions, participants undertook combined arm + leg cycling trials using two modified Monark ergometers involving three bouts of exercise at RPE 9, 13 and 17, in that order”. The order of exercise was actually RPE 13, 9 and 17.

The original article can be found online at <https://doi.org/10.1007/s00421-020-04444-z>.
