Correction to: Psychological Research
<https://doi.org/10.1007/s00426-021-01537-y>

In the original publication of the article, the information listed in Table 2 was not formatted correctly (1) all variables (e.g., “Depression”) are written in one or two lines, and (2)

95% confidence intervals are not broken (i.e., written in one line; e.g., [0.663, 0.790]). Hence this has been corrected and published in the erratum article as given below:

The original article can be found online at <https://doi.org/10.1007/s00426-021-01537-y>.
