Retraction to: *Neural Comput & Applic* (2013) 23:787–799
<https://doi.org/10.1007/s00521-012-0995-1>

The Editor-in-Chief has retracted this article [1] because it significantly overlaps with a number of articles including those that were under consideration at the same time [2, 3] and previously published articles [4–6]. Additionally, the article shows evidence of peer review manipulation. The author has not responded to any correspondence regarding this retraction.
