In the page 520 of the print published article, the line 5 (sentence starts with “More than 20%”) in the second column was published incorrectly. The correct sentence is given below.

More than 20% of the outcrop area are composed of granitoids and half of them are S-types (Foster and Goscombe 2013 and references therein). About 70% of all granitoids are peraluminous (Chappell and White 2001).
