To the Editor:

I would like to appreciate the readers for their helpful comments on our manuscript [1].

As they pointed it out, we performed an incorrect description by mistake. The correct formula for calculating GV is as follows: $GV\ (ml) = 27.0 + 14.6 \times CSA\ (cm^2) - 1.28 \times age\ (year)$.

I am grateful for the opportunity to correct our description.
