It is about a new edition of the handbook of treatment of the fractures of the hand.

This book details the surgical treatment of the majority of the fractures of the hand, of simplest with most complicated.

The first part relates to the various ways initially phalanges, métacarpiens and articulations. Many drawings make it possible to detail the various stages well and are supplemented by videos.

The left deuxième relates to clinical cases good documented taking again the various types of fractures, of the diagnosis until the operational care post via the treatment detailed with material AO (plates and screw).

Councils are given and the described shelves. It is thus about a practical book which useful for young people among us but also with oldest will be accustomed to the treatments of the fractures of the hand.
