The “G.B. Morgagni Prizes” are awarded under the auspices of the School of Medicine of the University of Padua and supported by an unrestricted educational grant from Servier.

The prizes, consisting of one Morgagni Medal (gold medal and 20,000 €) and two Young Investigator Awards (silver medal and 8,000 €), are conferred every 2 years for outstanding achievements in basic and clinical research in the field of diabetes and metabolic disorders.

Nominations are now open for the Morgagni Medal, which will be awarded to a distinguished European scientist actively involved in original and innovative investigations in the field of diabetes and its complications.

Each candidate for the Gold Medal should be nominated by at least two individuals who should provide the nominee’s curriculum vitae and supporting statements of not more than 500 words.

Applications for the Young Investigator Awards are also invited from young European scientists (not yet 40-years-old on January 1, 2010) who should forward a brief letter of application, curriculum vitae, list of publications and reprints of their five most important manuscripts.

The G.B. Morgagni Prize winners will be presented during the Tenth European Symposium on Metabolism in Padua (Italy) from 7 to 9 October 2010, and the recipient of the Morgagni Medal will present a lecture during the Awards Ceremony.

Nominations for the G.B. Morgagni Medal and applications for the Young Investigator Awards must reach our offices by 1 February, 2010. Documents may be forwarded by surface mail to the address below or by e-mail (saved in RTF). Reprints should be sent only by post.
