After publication, the author became aware that a derivation similar to the one presented in Sect. 3.1 of this paper had previously been published. Specifically, it should be noted that when $d=3.4$ (i.e. “Mogi’s Line”) is substituted into Eq. (11), it simplifies to be equivalent to the equation for σ_3^* derived in Appendix A.2 of the doctoral thesis of Rahjoo (2019).
