Correction to: Microchimica acta

<https://doi.org/10.1007/s00604-021-04727-y>

Figure 3 in the above article has been replaced. The authors apologize for an oversight during the submission process. The new figure presents additional data: EDX analysis was used to confirm the presence of Fe₃O₄ NPs in the composition of Fe₃O₄@GQDs@GM. The EDX spectrum revealed only the existence of C, N, O, and, Fe elements (Fig. 3C), which could be good evidence for the successful incorporation of Fe₃O₄@GQDs within the GM matrix.

The original article has been corrected.

The original article can be found online at <https://doi.org/10.1007/s00604-021-04727-y>.
