Published online: 5 June 2018

© Springer-Verlag GmbH Austria, part of Springer Nature 2018

In this issue, we start publishing a series on neurosurgical issues and problems in relation to pregnancy. The series is guest edited by Ekkehard Kasper, a new member of our editorial team. We will publish one article per issue and intend to cover the topic comprehensively. We will also invite authors to contribute to the series; the format is based on original research and reviews.
