

## Erratum

### **Dopamine and serotonin metabolism in response to chronic administration of fluvoxamine and haloperidol combined treatment**

**Y. Chertkow<sup>1,2</sup>, O. Weinreb<sup>2</sup>, M. B. H. Youdim<sup>2</sup>, H. Silver<sup>1</sup>**

[J Neural Transm DOI 10.1007/s00702-007-0753-1]

The original version of this paper unfortunately contained a mistake: in Introduction, page 1, second column, 6. to last line, the word 'not' should be omitted.

The correct sentence is: "The augmenting effect is associated with the serotonergic system since maprotaline, an equally effective nonserotonergic antidepressant, did not improve negative symptoms (Silver and Shmugliakov 1998)."

Authors apologize for the error.
