Blinding was not removed from the Study Design subsection of the Methods section prior to publication. Omitted information is provided below.

Participants were recruited via advertisements on social media (Facebook, Instagram, and Reddit) for the Stony Brook COVID-19 Pregnancy Experiences (COPE) Study—a longitudinal project to assess psychosocial impacts of the COVID-19 pandemic on pregnant women and their children.

The study was approved on April 21, 2020 by the Institutional Review Board of Stony Brook University (IRB2020-00227).

The original article has been corrected.
