Erratum to: J Biol Inorg Chem
DOI 10.1007/s00775-008-0424-1

The abstract of this article unfortunately contains an error.
The fifth sentence should read:

In contrast, only two Fe metalloproteins (ferritin and transferrin, corresponding to an average of 9 and 91% of total plasma Fe) and approximately five Zn metalloproteins (α_2 -macroglobulin and albumin-bound Zn, which corresponded to an average of 10 and 57% of total plasma Zn, respectively) were detected.
