Correction to: Clin Oral Invest (2014) 18:1061–1069
<https://doi.org/10.1007/s00784-013-1077-1>

Mw. M. Mijan will defend her PhD thesis on 15th September 2017. Whilst reviewing her work in preparation to the event, we discovered a few irregularities that prompted a recheck of the database and ditto analyses. These activities have lead to a few textual changes in the publication. On behalf of the authors I apologise for these omissions.

Abstract

Page 1061, column 2, line 6: 88.6 changes into 89.0

Results

Figure 1:

UCT group by 3 years, Nteeth changes from 75 into 130

UCT group by 3.5 years, Nteeth changes from 43 into 76

Table 2:

UCT group by 3 years, Nteeth changes from 75 into 130;
88.6 changes into 89.0

UCT group by 3.5 years, Nteeth changes from 43 into 76;
88.6 changes into 89.0

Table 3

UCT group by 3 years, Nteeth changes from 38 into 93

UCT group by 3.5 years, Nteeth changes from 22 into 54

Table 4. The number for fistula in the ART group is 11 not

1. This is a typing error.

No change in the conclusion.
