Correction to: Clinical Oral Investigations.

<https://doi.org/10.1007/s00784-020-03623-8>

In the original version of this article, the following were noted for correction.

1. A symbol ¶ as shown in Table 3 needs to be included in Tables 4 and 5.
2. The section under the header “Discussion” in paragraph 9 is edited for clarity.

The correct presentation is below:

Oral LDH levels in the control group decreased over the study period; however, the effects of the test group were

substantially higher. The test group consistently demonstrated statistically significant reductions from the control with a 9.5% noted after 3 weeks that increased to 13% at 6 weeks and 15% at 12 weeks.

3. Table 1: The Gender in column 1 needs a dedicated symbol and needs to be applied to the gender sentence and in the foot note.

The original article has been corrected.
