The Editors in Chief have retracted this article due to substantial overlaps with previously-published text by different authors [1, 2]. However, the overlaps do not concern the data reported in the article, and due to the unique nature of this data, the authors have been offered the option to submit a revised manuscript for further peer review. Junping Jiao, Yuping Wang, Yue Hou, Huimin Shi and Shujuan Tian agree to this retraction. Chao Gao did not respond to correspondence from the Editors about this retraction.
